## 71014_LYMINGTON_LECTERN

Supplying finished artwork in PDF format

Lymington style HARDROK 'panel sizes' are based on paper A-sizes and may accommodate edge-to-edge graphics. We suggest leaving an additional 10mm as the 'safe area' from the edge of the panel size to allow for manufacturing tolerances, important content should not be included within this margin. It is important that this margin of safety is also applied around the the 'obstructed rebate area'. This is the area on each panel that is not visible due to the way the tray is assembled into the post rebates. Any background colour should bleed outside of the finished artwork size by a minimun of 3mm, again to allow for manufacturing tolerances.
